## BATEMAN CANYON REPORTS A STRIKE OF HIGH GRADE ORE

Charles Hawkinson, one of the locators of mining property in Bateman canyon near Hilltop was in Austin Monday on his way home from Phenolite where he had been on mining business.

Mr. Hawkinson stated that the original strike and location of promising property in Bateman canyon had been made by Jack McGovern but that the news of the discovery had been kept quiet until now. He showed some as pretty specimens of ore as ever came from a silver mine and says the new discovery is a ledge three feet in width, with twenty inches that will go into the sacks for shipping from the start. McGovern struck the ore at a depth of fifty feet and has been taking out pay rock ever since.

Many locations were made, following the news of the luck of McGovern, among which were the locations of Hawkinson, who will at once proceed

## TUNGSTEN GROUP AT M'KAY IS IMPROVING WITH DEVELOPMENT

What may turn out to be the richest showing of tungsten in the United States is in course of development at Pilot Mountain, ten miles east of Mina. This is the location of the camp that has been mentioned repeatedly under the name of McKay, which the owners are beginning to realize is going to be a proposition of huge proportions. The tungsten occurs in Scheelite, in a garnet formation in ten parallel ledges some of which are fifty feet in width. Samples from these ledges run between 1 and 20 per cent and a fair average is regarded as close to 3 per cent which would make the deposit one of rare value. The ledges also carry gold and silver but the tungsten is a beautiful concentrating ore than runs on the plates as easily as gold. This has been demonstrated by panning where the values peel right off like taking clothes off a bed, as one of the locators said. Several incline tunnels are on the group but the main workings will be through a shaft sunk on Gun Metal exam No. 3 on that part of the property known as the McKay-Ableman group. This shaft is down 14 feet in commercial ore and developments will be continued with the object of proving up the group with a view of installing a concentrating mill on the ground. In anticipation of this action three springs on the property with a capacity sufficient

## Perissmons as Food.

The only fruit, says a bulletin of the department of agriculture, which equals the persimmon in its value as a food is the date. Nevertheless many persons with fine persimmon trees in their possession are allowing the fruit to go to waste, either through ignorance of the many uses to which it may be put or through prejudice. There is a saying in the persimmon country that persimmons are "good for dogs, hogs and possums." This, however, is declared to be a gross injustice to a very valuable product.

One reason for the neglect of this fruit is the mistaken idea that persimmons are unfit to eat until they have been touched by frost. As a matter of fact, much of the best fruit is lost every year because it ripens and falls to the ground, where, not being touched by frost, it is left to rot. Such persimmons as are not edible before frost comes are a late variety of the fruit, and the reason that they pucker the mouth is because they have not yet ripened. In general, the best fruit is that which ripens just before the leaves fall.

## PASTRY COOK FROM COAST

Peter Fabbe is now prepared to supply the finest pastries fresh from oven to consumer. This morning there arrived in Tonopah one of the best pastry chefs who has had extensive experience in the Fairmount and Palace Hotels and who will be found hereafter with the Progress Bakery.

## DEATH OF ORLANDO F. JENKS

Orlando F. Jenks, a former Tonopah business man, and who has resided in Reno for the past six years, died in St. Mary's hospital in Reno last Monday from a basic fracture of the skull sustained in an auto accident on the road to Sparks a week ago Friday evening.

## Caffeine.

Caffeine, the active principle of coffee, was discovered by Runge in 1820. In a pure state it takes the form of long silky needles. In ordinary coffee it is present to the extent of about 1 per cent, but Java coffee contains 4.4 and Martique has as much as 6.4.

Setting Her Right. Aunt Rachel—I see you've patched it up with Archie and he's coming here again often than ever. He's asked you to marry him fifty times, hasn't he? Miss Mandy—Oh, dear, no, aunt, but I suppose he has asked me fifty times to marry him.

If you want the telegraph and local news—try the Bonanza.

with the development of his property.

Of Phenolite, Mr. Hawkinson said that the work of Bruner on the Silent Friend and other properties owned by his associates was proving a most promising property with gold ore coming to the surface regularly in quantity to justify all the plans of the company for the early installment of a milling plant to treat the ore on the ground.

Hawkinson is a seasoned and hardened Nevada prospector. Of the future of Hilltop, he is sanguine and sees dollars in the new strike at Bateman canyon which is but a mile and a half away, renewed confirmation of his faith in the mineral importance of the north end of the Toyahvale range.

He reports four leasers busy taking out shipping ore on the Grey Eagle property owned by the Horton brothers of Battle Mountain and operated under the management of Geo. Triplett.—Reese River Reveille.

to run a concentrator of over 100 tons capacity have been filed on. One sample gave 6.80 per cent tungsten across a width of eight feet.

The locations were made by George W. Clark, Jack Shepard and Hermann Trappman, but since the original work the group has been strengthened until it now comprises 27 claims tied in a compact body owned by Jim McKay, Nick Ableman, J. Jordan, H. M. Clifford, John Manion, Hermann Trappman, George W. Quigley, George W. Clark, H. B. Peterson, Jack Shepard and John Cornbelk. The camp was an early day location made by Judge Averill, Bob Stewart and H. C. Cutting who were prospecting for silver without any thought or knowledge of the value of the latter day metal which now commands such a high price. The original name was Stewart's Cabin and the district was christened the Shoshone Mining district.

After some more work has been done it is proposed to take out enough ore for a 25 ton shipment of 60 per cent tungsten by sending the ore to the Luning mill now operated by Atkinson-Kroll company on Sodaville ore. The latter company is rushing work on its big concentrator at Sodaville and as soon as that is completed the tables at Luning will be available for an experimental run of the McKay product.

## Important Work At Lone Mountain

W. T. Moran, president of the Gold Hill Nevada Gold Mining company is spending a few days here looking after the interests of the company's property at Lone Mountain where conscientious and extensive development has been going on during the past four years.

Mr. Moran has been actuated by the idea that at depth the Tonopah formation would be encountered and that another district equally as rich in mineral as this camp would be placed on the map. With this conviction the management has been diligently sinking until a depth of 465 feet has been reached with the intention of going to 800 feet. The formation is andesite which is commonly believed to overlie the value bearing schist. The sinking was done on croppings carrying gold values but since the discoveries of other companies operating in the same district, who are shipping lead and copper from depths less than one third of the Gold Hill company, the latter has been considering the expediency of temporarily stopping work on the gold camp and going over to its No. 8 claim where a ledge crops for a distance of 300 feet carrying \$30 in gold, 16 per cent lead, samples of the latter running as high as 30 and 40 per cent lead. This ledge was recognized when the company began operations at Lone Mountain but at the former price of lead it was realized that the gold

values offered better inducements for permanent returns. Now a proposition is under advisement to proceed with work on No. 8 claim where the possibility of finding shipping ore almost on the surface is of a most encouraging character. This claim is three quarters of a mile from the main working shaft and there is an easy grade leading down to McSwaney's siding, which would be the shipping point. The group owned by the Gold Hill company is being operated as subsidiary of the parent organization.

President Moran is going to Nevada City to spend his fifteen days vacation allowed by the city of San Francisco and on his return home, he will immediately take up the suggestion of looking to a change of operations. He has no doubt that his views will meet with the approval of the other directors but until that sanction is received he cannot make any promises about new work.

Incidentally this San Francisco company has bought an auto truck to replace the motor truck that has been in service and also bought a carload of timbers for lining the main shaft. The company does not owe a cent and none of the officers except the superintendent receives a salary. An illustration of the methods of the management is found in the fact that the entire office expenses of the company last year amounted to only \$52.

## BIG FIGHT AT THE AIRDOME

MATHEWS AND MCCARTHY WILL MEET TONIGHT IN A TEN ROUND BOUT

Danny Mathews and Johnny McCarthy, who meet tonight at the Airdome in a ten round bout are reported to be in the best of condition. Both men are confident of scoring a decisive victory and the fight fans will witness a sensational battle.

Owing to his long experience in the game of give and take, McCarthy has been made a favorite in the betting, but Goldfield fans who have seen a lot of Mathews, will undoubtedly be at the ringside with rolls of money to bet on their favorite and the men should enter the ring at even money. Mathews isn't a real beginner in the boxing game, having won over such well known fighters as Frankie Gage, Phil Knight, Matt Brooks and Babe Picato and many other good boys on the other hand McCarthy has held his own with some of the topnotchers of his weight, including Packy McFarland, Willie Ritchie, Jack Britton and Matty Baldwin.

Kid Bromes, who meets Chalky Miller arrived this morning from San Francisco and judging by his record should give the colored cyclone quite a battle, the latter isn't worrying any over the San Francisco boys records and can be depended on to put up the battle of his life.

Something new will be introduced to the fight fans tonight when The Flying Dutchman, who is also known as Charlie Chaplin, meets Tony Barracage in a twenty minute wrestling match. Both men claim the championship of Nevada and are in condition of putting up a hard struggle.

The boxers will weigh in today at 5 p. m. in the Cobweb bar.

## PERSONAL

TOM KENDALL arrived from the coast on today's train.  
JAKE RUEDY, who conducts the Sodaville hotel, autored in from there last night returning there this morning.

JOHN C. RUPERT, Albert A. Carpenter and Charles Bernini are in from Willow Creek, where they are developing a prospect.

H. C. BROUGHER left this morning for his home in Oakland after spending a couple of days looking after local interests.

A. A. CLUTE and wife who have been at Oatman and San Francisco for the past three months returned to Tonopah on today's train.

MRS. CHARLES DUCHENEAU was a passenger this morning for Berkeley where she will spend the coming months at her summer home.
